Gentle Peat Mask and Scrub ISO 16128

Description:

Gentle Peat Mask and Scrub ISO 16128 is a soft exfoliator based on peat. It gently removes dead cells and impurities from the skin to get a smooth and radiant complexion. Applied as a face mask, it hydrates and softens the skin while increasing its elasticity. It is ideal for mature skins as it increases firmness, microcirculation and collagen production.

Key ingredients:

- Micromatrix® Fractile AF AN is based on natural polysaccharides and Hydrogenated Polydecene (Alphaflow®). It forms a micro thin film, which creates an instant sensation of coolness upon application. Thanks to its polymeric matrix structure, Micromatrix® Fractile AF AN provides a good skin hydration and a long-lasting smooth after-feel.
- Nordic Beauty Linum Finlandia is a natural vegetable oil extracted from flaxseeds. It is rich in monounsaturated fatty acids, vitamins and minerals. This oil is ideal for skin care products as it moisturizes, smooths and protects the skin.
- Nordic Beauty Peat is a pure natural product from Nordic nature. It is rich in humic and fulvic acids, bio-minerals, trace elements, vitamins, amino acids and fatty acids. It acts as a powerful firming agent while increasing microcirculation and collagen production.

Ingredient	Phase	INCI Name	Qty%	Function
Micromatrix® Fractile AN AF HV	A	Water (and) Corn Starch Modified (and) Hydrogenated Polydecene (and) Preservative system according to customer's choice	50,00%	Texturizer, Rheology modifier, Refreshing
Micromatrix® Fractile AF AN		Water (and) Corn Starch Modified (and) Hydrogenated Polydecene (and) Preservative system according to customer's choice	23,00%	Texturizer, Refreshing
Nordic Beauty Linum Finlandia		Linum Usitatissimum (Linseed) Seed Oil	10,00%	Nourishing
AHA-BSC® SAP	B	Silica (and) Hydrogenated Vegetable Oil (and) Hydrogenated Coconut Oil (and) Titanium Dioxide (CI 77891) (and) Distearidimonium Hectorite (and) Iron Oxides (CI 77492) (and) Propylene Carbonate	2,00%	Soft focus agent, Soft skin feel, Pigment
Nordic Beauty Peat	C	Peat (and) Preservative system according to customer's choice	15,00%	Exfoliant

Procedure:

Weigh phase A and put under stirring.
When phase A is homogeneous, add phase B.
Then add phase C under stirring.

Efficacy testing:

5 subjects - On the inner forearm:
Delta E after 6 consecutive scrubs (Reference = coloured skin) : 38,16

ISO 16128 Indexes:

Natural Content: 92,61%
Natural Origin Content: 93,76%

Organic Content: 16,91%
Organic Origin Content: 16,91%

Important:

Nordic Beauty Peat does not stand pH variations above 1 point.
