# COLOURMAT® MANGOES

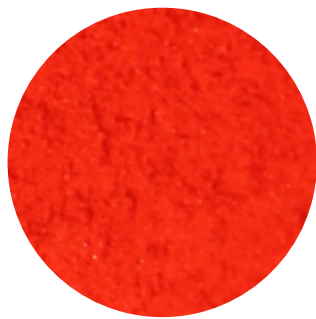

## » FASHION COLOUR COLLECTION

**Colourmat® Mangoes** are intensive matte colour composites for the hottest make-up looks. This range is based on muscovite mica, lauroyl lysine and alkyl silane surface treatments. Mica is responsible for the mat effect, lauroyl lysine gives a long lasting application and alkyl silane provides non-transfer finish. **Colourmat® Mangoes** with platelet shaped particles give amazing skin adherence and are stable under high heat conditions. **Colourmat® Mangoes** provide strong colour and super mat appearance upon application.
