# CREASTAR® MELANOSIS

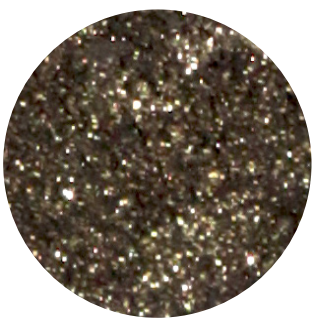

» MAGNETIC COLOUR COLLECTION

**Creastar® Melanosis**, a range of intense smokey colours based on light reflecting diffractions with dark base, originally created in 2009 by The Innovation Company®.

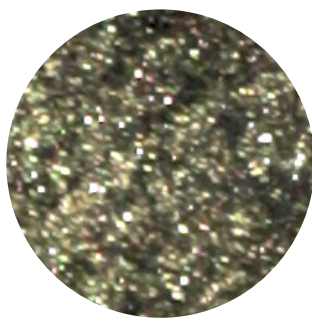

To allow a better skin application, **Creastar® Melanosis** powders are strongly magnetic by nature. This magnetic effect provides extra skin attraction along with skin friendly ISO 16128 natural index, photo-stable, odorless and extremely soft coating material.

**Creastar® Melanosis** brings a new type of benchmark for eye shadows and lip glosses. A major customer describes them as "spellbinding", in a new quality loose powder autumn collection of 5 shades.

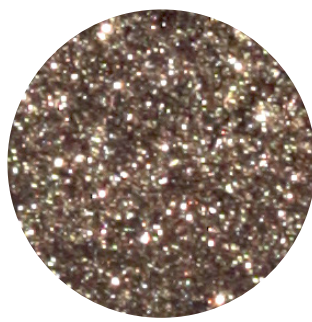

The Innovation Company®, the home of creation, offers the original 20 shades from 2009, and more to come. Stay tuned.
