» THE FIRST DOUBLE MICELLE LOTION FOR CLEANSING AND REJUVENATING THE SKIN

The skin is an amazing matrix that harbours many toxic pollutants.

They are not only from external sources but also from internal, as high content of Carbon Dioxide or other detrimental gases, from bio-processing.

As its name suggests, **the First Double Micelle Lotion** has a double effect as it cleanses the skin from both internal and external pollutants. The effect is based on two different micelle systems:

The first micelle system is **a soft and powerful cleanser and tonic that is based on mild and gentle surfactant, Creasurf®**. It has liposome type spherical micelle structures, which capture the impurities of the skin.

The second micelle system is **created with Fiflow® BB 61, which is a powerful di-electric**. It distresses and smoothens the skin surface for an optimal cleansing and revitalizing effect. As a gas carrier, Fiflow® also reduces further build up of harmful gases.

The formula also includes one of the trendiest ingredients of the year, **Nordic Beauty Birch Sap**, which is a hydration splash full of nutrients and vitamins.

The First Double Micelle Skin Lotion - try it, your skin will love it.
