  - Re-establishes skin's natural pH balance
  - Increases microcirculation
- 
- Fully natural
  - High bioactivity
  - High nutrient content
  - Smooth application without hard particles

**Nordic Beauty Peat** is a pure natural product from Finland, nothing has been added and nothing has been extracted from it. It is rich in biologically active substances, with high quantities of humic and fulvic acids. It also contains bio-minerals, trace elements, vitamins, amino acids and fatty acids, which are bioavailable to the human skin.

Hundreds of herbs, flowers and plants undergoing the extraordinary chemical transformation by biological degradation of organic materials through biochemical processes are now replenishing the peat. The unique molecular structure of the substance is so fine that it penetrates the skin and rejuvenates cells.
